

IAP 2017 Coastal Ecology

2.981 New England Coastal Ecology

Units 2-0-1 (P/D/F)

Lecture: TR 10:30 – 12:00 (5-233)

Field Trip (mandatory): Friday Jan. 20, 9am-5pm

Combining lectures and visits to field and research centers, participants will be introduced to marine communities found along the coast of New England.

Emphasis will be on the ecology of salt marshes and rocky shores and the plants and animals living there; the ecological services these communities provide us, and some likely impacts of current and future climate change.
