ASMFC Seeks Proposals for Regional Pilot Projects in Support of Sustainable Aquaculture Proposals Due April 15, 2019

Arlington, VA –The Atlantic States Marine Fisheries Commission (Commission), in partnership with the National Oceanic and Atmospheric Administration (NOAA), is seeking proposals to develop regional pilot projects in support of sustainable aquaculture. Specifically, pilot programs should partner with industry to develop techniques and business models to grow domestic seafood production. A priority are projects that consider promising but less commercially developed technologies for species managed by the Commission or those species that contribute to healthy marine habitats, including finfish, shellfish and seaweed.

The NOAA Fisheries FY19 budget contains the “Regional Pilots in Sustainable Aquaculture” provision that authorizes the funding. In addition to this specific item, the budget also focuses renewed interest on maintaining and further developing existing aquaculture capabilities at NOAA Fisheries.

NOAA Fisheries, through the Commission, is making \$525,000 available for the funding period of July 1, 2019 to June 30, 2020. Individual proposals should fall within a range from \$50,000 to \$200,000. Any investigator seeking support for this period must submit, as a single file, an electronic proposal by email no later than **5:00 p.m. EST on Monday, April 15, 2019**. Awards and start dates for successful projects will be announced by May 20, 2019. Please see the Request for Proposals (RFP) for complete proposal details, qualifying requirements, and submission instructions. The RFP is available at http://www.asmfc.org/files/RFPs/ASMFCAquacultureRFP_March2019.pdf.

The Gulf and Pacific States Marine Fisheries Commissions have also issued similar RFPs seeking proposals relevant to their respective regions. For more information, please contact Dr. Louis Daniel at ldaniel@asmfc.org or 252.342.1478.

PR19-07

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and anadromous species.
